

## Exterior Products - Available Colours

Products for exterior applications are preferably made from aluminium because of its durability, lightweight, and the many attractive finishes that may be applied. The HunterDouglas Exterior product range includes Exterior Ceilings, Single Skin Façade Claddings and Sun Louvres. These products are available in various panel types and widths as listed in the overview below. The numbers next to the pictures refer to the corresponding column in the colour availability overview. Hunter Douglas has developed a patented coating system for its external architectural applications named Luxacote®.

(See reverse side)

### Exterior Ceilings

L-profile, flush-, V5- and V6 join profile only for 84R. Recessed join profile only for 80B.

### Single Skin Façades

V5- and V6 join profile only for 84R.

### Sun Louvres

# The Luxacote® finish

Our Luxacote® finish is specifically designed to withstand severe external conditions. The topcoat contains a solid UV filter, which guarantees perfect colour and gloss stability. This topcoat provides resistance against scratches and abrasion while the alloy and pre-treatment ensure corrosion resistance. Hunter Douglas products have been subjected to extensive laboratory and real-world testing to ensure the highest quality and durability.

Independent external tests have proven the excellent characteristics of Luxacote® finishes that include;

- Colour and gloss stability
- High scratch resistance
- Corrosion resistance
- Colour options

Unprecedented Protection  
**LUXACOTE®**  
for exterior application
